RIPE Resource Transfer Policies

Presenter :

Erik Bais – ebais @a2b-internet.com

Policy proposal info

- Author – Erik Bais
- Current status : Review Phase: Open for Discussion
- Version online – v2

Policy proposal

- In short : Create a single policy document, with all relevant policy text.
- The goal is to remove all transfer related text from the other policy documents and stream-line where possible the policy text to a common agreed policy text.

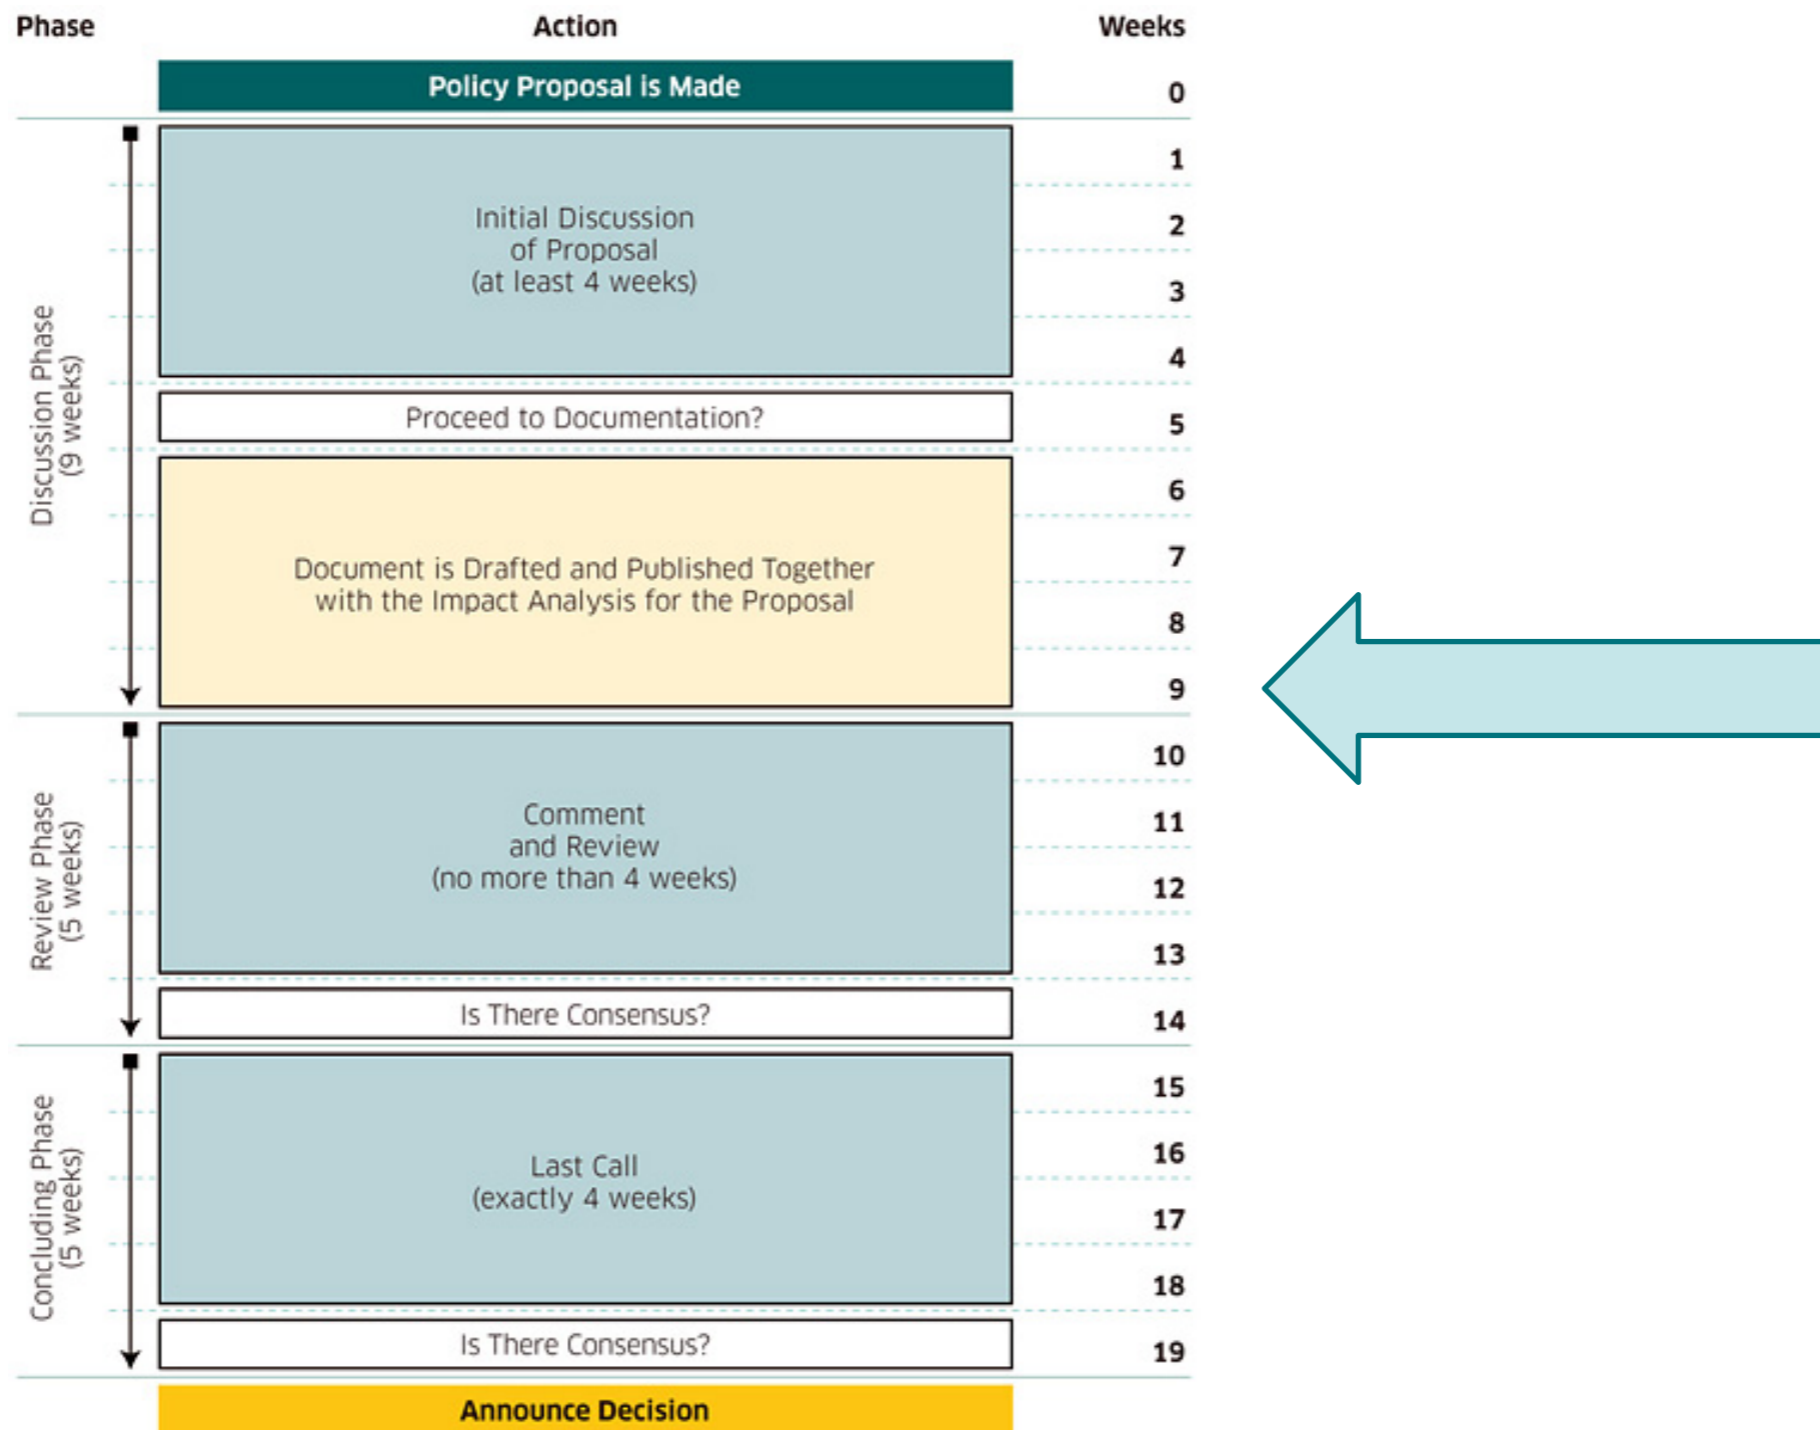

The general idea ...

- The goal of starting this proposal ...
 - Is to clean-up the various allocations / assignment / ipv4/ipv6 and AS number documents ...
 - And the thinking was quite sound and logical ..

But is it ??? ...

So where are we exactly ??

So where is it ?? ...

- The timeline for the publication of the Impact Analyses was quite aggressive looking at all the other agenda's...
- RIPE71 agenda.
- IGF last week
- So what happened .. ?? ..

Marco (the RIPE PDO) Schmidt

And there was a catch *

There is an issue in the text of the draft

Questions to ask from me to you..

- Do we want functional policy documents that cover ... all ... ? ...
 - Are we planning to do similar documents or is this a special ?
 - IPv4 Address Allocation and Assignment
 - IPv6 Address Allocation and Assignment
- VS
- Transfer document

So .. Next steps..

Questions?
